

Shubham Bhagwan Salunkhe

Frontend Developer

salunkheshubham0@gmail.com | 9004409190 | Kandivali,Mumbai | [LinkedIn](#) | [GitHub](#) | [Portfolio Website](#)

SKILLS

- Frontend: HTML, CSS, Sass, Tailwind CSS, JavaScript, jQuery, TypeScript, React, Redux, Next.js.
- Backend: Node.js (Express), Java (Spring Boot), Python.
- Databases: MySQL, MongoDB, Firebase.
- Frameworks & Tools: React Native, Git, FFmpeg, Algolia, OpenAI, TuneY's AI.
- Other Skills: Scalable architecture design, AI Integration, API integration, Agile methodology, Responsive design.

SUMMARY

Frontend Developer with 3+ years of experience building user-centric web applications for distinguished global companies, such as Mastercard, Mercedes-Benz, Vodafone, Shell and many more. My background includes designing AI-driven content platforms, contributing to music streaming services, and leading teams in high-impact projects. With a solid technical skill set and a passion for learning, I excel at collaborating with diverse teams to deliver exceptional digital solutions.

EXPERIENCE

Senior Frontend Developer

GoPhygit Private Limited

Mumbai

September 2021 - Present

- Architected a cutting-edge AI-driven content generation system; resulted in enhanced creative workflow efficiencies measured at 25% during initial user feedback sessions.
- Implemented advanced text-to-speech functionality with 1800+ voice profiles, Over 10 refinement options for fine-tuning precise voice outputs, offensive content detection, and timeline-based voice placement.
- Configured innovative AI tools enabling real-time track creation, remixing with over 6+ customizable parameters; contributed directly to a marked increase in user-generated content by more than 300 unique tracks monthly.
- Leveraged OpenAI for generating track names, descriptions, and visually appealing cover images, and Processed more than 500 audio and video files each month with FFmpeg while implementing advanced features like merging tracks seamlessly and applying fade effects to create high-quality sound outputs for users.
- Built a music streaming platform integrating Algolia search, Spotify APIs, Cyanite analytics, similarity search, personalized playlist, curated recommendations and track trimming.
- Created an admin panel for efficient asset uploads, user management, reporting, and monitoring, reducing administrative overhead by 45%.
- Delivered lightweight AI-based applications for Coca-Cola and Mastercard, achieving 95% customer satisfaction on tailored deliverables.
- Engineered a unified, scalable codebase supporting multi-brand theming, feature toggles, localized components and reducing production errors by 50%.
- Played a leading role in the project, contributing 85% of the frontend development over 3+ years.
- Mentored 6+ team members in best practices, enhancing code quality and accelerating project timelines by 25%.

PERSONAL PROJECTS

Aimer Candles – [View Demo](#)

ECommerce Website + PWA

- Spearheaded a PWA with Firebase Authentication and a responsive design, providing an installable app experience and improving user retention by 40%.
- Formulated a Redux-powered cart system, a blog section for product updates and stories, integrated theme toggles, advanced product filtering, and categorized product management, increasing conversion rates by 15%.
